

WE LIVE FOR BUSINESS
AND BREATHE TECHNOLOGY

Who we are

We are experts in Projects, Implementation, Products and Solutions, Services, Technical and Sales Support, and Training.

We encompass the most advanced technologies in: Call Server (telephone systems), Mobility, Call Center, CCTV Systems, Access Control, and Infrastructure.

Our aim is to bring together people, technology, and strategy around one objective: generating value for businesses. By operating with the best market practices, we ensure consistent results for our partners, information security, and a technology infrastructure that meets the challenges of the information age.

Partners

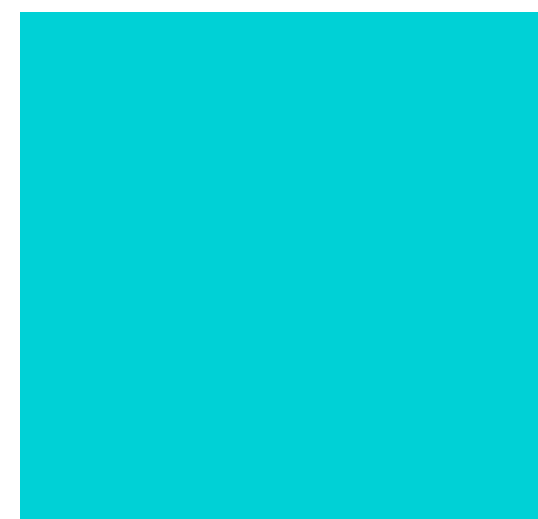

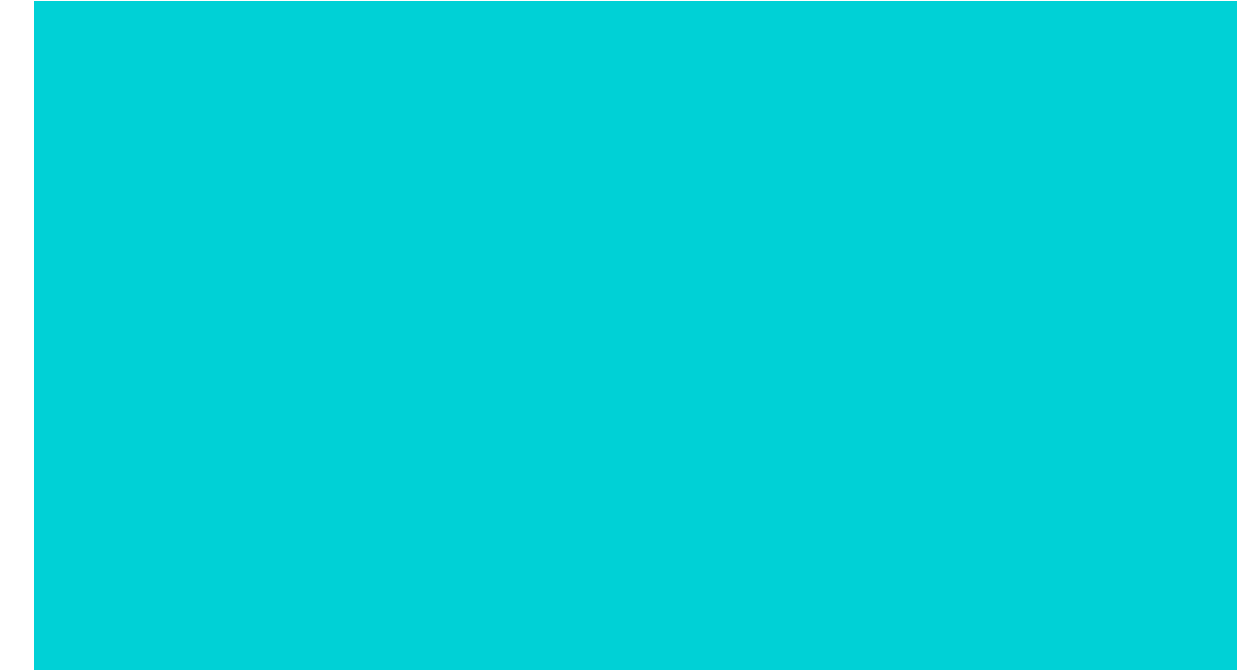

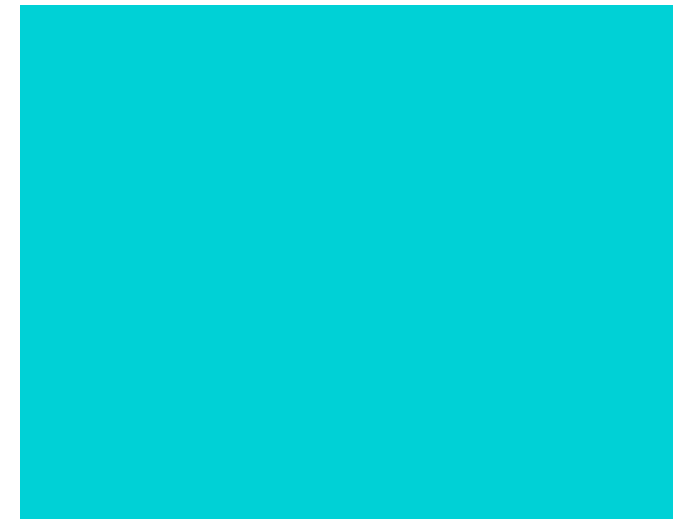

We have the full support of our partners, who are leaders in their respective sectors and providers of the most innovative technological solutions.

Leading Video Surveillance Technology: With decades of experience in video surveillance, **IndigoVision** has developed innovative and reliable technologies that ensure the capture of high-quality images, even in challenging environments such as oil platforms and offshore facilities.

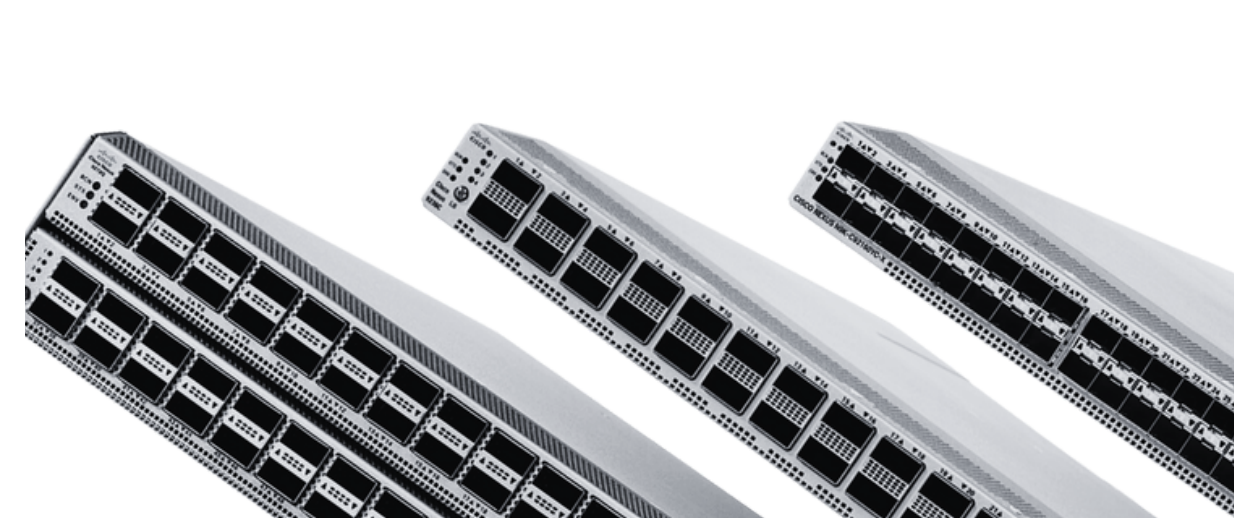

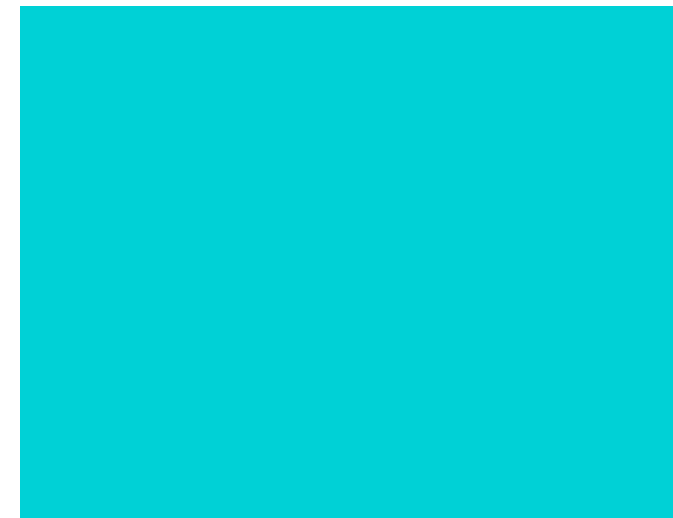

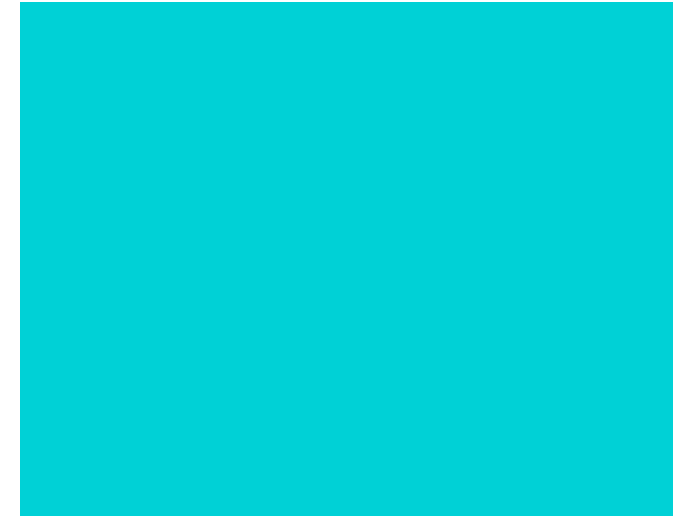

- **NVR compliance with Petrobras Standard Annex III-C;**

- **Data center solutions;**
- **Network and communication support;**
- **Spare parts;**
- **L2 and L3 switches;**
- **Small and medium-sized servers;**
- **Desktops and notebooks.**

Site Survey

Determine the best architecture for your wireless network with the Site Survey services from Ideas Capital. This essential methodology helps you plan your investment in a wireless network effectively.

The Wireless Site Survey methodology is executed through on-site signal measurements and aims to validate signal coverage, noise levels, shadows, and interferences, as well as the positioning of access points.

IT for Oil and Gas

IT and Telecom services for the offshore environment in the Oil and Gas and maritime market.

The Ideas Capital team has extensive experience in the offshore market with a specialized team for offshore operations.

Whether it's supporting your offshore computer network, satellite link, satellite TV or data antenna, we have experience in aligning with Petrobras' IT and Telecom contract (Annex V or VI), as well as cases of vessel commissioning.
